Subject: Region 10 Weekly

Just a couple of items to report on this week:

[REDACTED]

[REDACTED]

[REDACTED]

I will also be mentioning progress we have made implementing remedies at the Silver Valley and FMC Superfund sites and progress by the City of Boise in working working with us on a water quality offset for the Dixie Drain allowing the city to offset some of the required end of pipe discharge at its treatment plant by cleaning up phosphorous from an agricultural drain to achieve some long sought non-point source improvements. We are coordinating with the state on a TMDL that could allow water quality trading building on the Boise example throughout the rest of the valley.
